

Chairman's Chat

Hello everyone, Firstly I would like to thank you all for your continued support after an awful 2012, I am now back on the mend and raring to go.

I hope you all like the CD version of R & B, a 700 MB disc can hold a lot of information, please let me know what you think.

My 2 printers have gone bust and the only one available charges too much, there is also the colossal rise in postage.

On a sad note, we have lost our member William T. Plant, who died in his sleep on May 9th this year, our sympathy is with his family

This issue has an article about Henry B. Plant, sent by Kathy Compagno in the US, also a usual contribution by Dr John Plant, However there is a photo taken by Sian Plant of a Private C. Plant on a memorial on Stafford Railway Station, anyone know who he is? see if you can spot him There is also Cheshire patents of yester year, not Plant related but very interesting.

Sian Plant has been recording Plant marriages over many years and has sent me all her work, which is quite a document, too much to print but can easily be transferred to a CD and sent to you all.
